

Easter 2023 Message

What is the greatest festival?

People have managed to degenerate every feast, no matter what the background, into a source of money. Those who participate support a deeply destructive system and at the same time fail to recognise the real needs of spirituality and awareness.

What kind of times are we living in?

From time to time I had heard that we are living in an "important" time - the end times. I could not really imagine anything under this term. I imagine the "end times" as a long process that lasts for many centuries. It would be more important for me to know where we would find ourselves in this end-time drama.

There are many indications that Christ could come again.

How could that be?

If his appearance this time were some kind of **supernova**, who would recognise the power of his consciousness?

Would this experience be similar to a **quantum leap**?

What could this mean for coexistence on this earth?

Would the insight last or would the majority sink back into materialistic everyday life?

Now imagine that this **supernova** was completely **pure truth**. What would happen to an energy that was created out of deceit and lies? Which has solidified and spread over many centuries? It could not exist, could it? It would dissolve. If these are people who consciously deceive and lie, would it still be possible for these souls to endure the enormous discrepancy that would arise? If so, for how long?

Life is so much more than the expression of souls in the material world. What do we use the chance to live on this earth for? Life is movement, vibration. Every thought, every feeling comes out of a movement and shows itself in a certain frequency as colour and in another frequency as sound. The name of the absolute infinite Beingness permeates all life! This name is sacred and not even pronounceable by human tongues. Whoever perceives this Name is liberated from many dogmas. Through his unconditional love we live and make our experiences in the worlds of duality. The absolute infinite Beingness expresses itself through itself as perfect wisdom and omnipotence - as Creator.

Many years ago, it must have been the end of the 90s, I was very, very sad for a few days. When I looked at the trees and bushes, they too, indeed the whole of creation looked completely sad. Everything was covered in a veil of grey. The friend I had at the time almost despaired and asked if this was because of him, if he had done something wrong? "No, it has nothing to do with you, I don't know why I am so sad," I replied. Then, on Easter Monday morning, I suddenly knew with all clarity that **Christ is alive**. The sadness was blown away and now I also realised that I had been sad since Good Friday. I had one question at that time: will it be like this every Easter? In the meantime I know. It was the only time. But the impression was deep and lasting.

Happy Easter! The name of the Lord is holy! I hope that every human being can one day experience the ineffable name of the absolute infinite Beingness.
